-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. Claims 1-34 are pending.

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5 and 10-15, and 33 are drawn to a recommender for usage in a data mining system comprising a scoring engine capable of scoring information using at least one data mining model that derives scores from aggregated data, classified in class 707, subclass 10.
  - II. Claims 6-9 are drawn to an information handling method comprising of constructing aggregates for a case set, classified in class 707, subclass 5.
  - III. Claims 16-20 and 34 are drawn to an information handling method comprising of creating simple aggregates using a simple aggregate wizard comprising selecting a record-set to be aggregated from a list populated with all objects in a context class, classified in class 707, subclass 5.
  - IV. Claims 21-32 are drawn to an information handling apparatus comprising an aggregation wizard further comprising of a first list populated by elements of structure and by a derived method that takes class of the structure as a parameter, classified in class 717, subclass 106.

2. Inventions Groups I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination Group I has separate utility such as a data mining system comprising of a scoring engine, an offer manager, an aggregation engine, a user interface, and at least one aggregate wizard. Subcombination group II has a separate utility such as an information handling method comprising of constructing aggregates, computing aggregates, and iteratively mining data. Subcombination group III has a separate utility such as an information handling method creating simple aggregates. Subcombination group IV has a separate utility such as an information handling apparatus comprising of an aggregation wizard. See MPEP § 806.05(d).

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
